Campbell Family Genealogy

By tradition, in the time of James the First of England, Sir John Campbell, of Scotland, was duke of Argyle, and assisted at the coronation of his sovereign. Daniel, a descendant, was born in 1660, at Argyle, Scotland; settled at Londonderry, Ireland, and during the struggle in 1688 and '89, he became an officer under William, Prince of Orange, participated in the Battle of the Boyne, which being won, placed William securely upon the throne of England. He had several children, among whom was —

Generation 1: Henry Campbell, born at Londonderry, Ireland, 1697; married in 1717, **Martha Black**, daughter of Capt. William Black; he was swept in with that great tide of emigration which was flowing to the shores of New England. He, with his family, came to Watertown, Mass., and soon joined his Scotch countrymen at Londonderry, N. H., living on the Turnpike, near Gregg's Mills. In 1733 he bought 240 acres of land in Windham, of John McConihe (spelled MacConechy/Mcconechy in deed dated 17 March, 1733), upon which his descendants still live. This land included the present farms of Henry-C. Crowell, Hiram-S. Reynolds, part of Gardner Robinson's farm, part of F.-J. Hughes's farm, the place of Charles-K. Barker, and the farm of Deacon Samuel Campbell. His home was where Henry-C. Crowell later lived. He died Oct. 1, 1782; she died April 14, 1778, in her 85th year. They are buried in the old cemetery on the plain. He was a signer of the Petition for Charter in 1740 that resulted in the incorporation of the Town of Windham in 1741.

According to L.A. Morrison's History of Windham in New Hampshire,
"The *first* mention of any mill in Windham is on Nov. 17, 1750, when a highway was laid out 'to Henry Campbell's new sawmill.' This Henry Campbell, emigrant ancestor of the Campbells of Windham, had located on the Henry C. Crowell place in 1733, and being a progressive man, having the public interest, as well as private, at heart, had erected a mill as early as 1750. This was located in West Windham, on Beaver Brook, at what has latterly been known as Burnham's Mills. This mill was owned by the Campbells for many years." Bessie McCleave Campbell's research notes say that Henry was also called the "Emigrant."

Generation 2: Deacon Samuel born Londonderry, Ireland, 1722; died Feb. 1, 1797, He was the first occupant of the farm later occupied by his great-grandson, Deacon Samuel Campbell; his first house stood near Beaver Brook. He also built the house demolished by Deacon Campbell a few years since; his education was good, and he was one of Windham's first teachers. He became prominent in town, and often held positions of trust; he was clerk from 1761 to 1774 inclusive; presided in eight town-meetings; selectman in 1744, '51, '65, '66, and '67; was made an elder in the church during Rev. John Kinkead's ministry. He was a soldier of the Revolution. He married **Mary Robinson**, born in Ireland c.1722, she died Dec 13, 1792, in her 70th year.

Generation 3: John, b. Windham Nov. 3, 1762; d. Nov. 13, 1832, age 70 yrs. He lived where his father had resided before him, on the farm which his grandson, Deacon Samuel Campbell, occupied. He was an active and influential man in the town, and was prominent, being in positions of public trust for many years. He was town clerk in 1799, 1801, 1805; moderator of annual meetings, 1810, '11, and '14; selectman, 1794, '95, 1802, '04, '06, '08, '09, '11, '24; representative in 1812, '14, '15, '16, '17, and '18. He m. Dec. 25, 1787, **Sarah Burns**, and d. Nov. 13, 1832, age. 70 yrs.; she died Feb. 26, 1812, age 45 years; he married 2d, Feb. 8, 1814, **Sarah Anderson**.

Generation 4: Robert Moor b. Windham Dec. 13, 1789; d. April 24, 1864, age 74 yrs. He lived upon the farm now owned by his son, Deacon Samuel Campbell. He was a stirring man, and took an interest in all the public institutions of his town ; was a member of the church and religious society; served as selectman in 1830, '31,'32, '33, '37, '41, and '42, and was collector of taxes for several years. He married Dec. 13, 1814, **Anna Carr**, who was the mother of his children; she d. Sept. 20, 1837, age 50 years; he married 2d,

Susan Burbank, who died Jan. 20, 1843, age 36; he married 3d, Elizabeth C. Osgood, who died Feb. 6, 1854, age 46 years; he married. 4th, Mrs. Mary(Clark) Davidson, who lives in Manchester. He died April 24, 1864, age 74 yrs.

Generation 5: Deacon Samuel and Lydia E. Crowell. Samuel was born in Windham Sept. 1, 1819. He and Lydia lived upon the farm whose broad acres were first turned over to the sunshine and the rain by the plow of their great-grandfather, Deacon Samuel Campbell. There before him three generations of his race have toiled and collected the annual harvests; and there he in contentment and peace yearly plants and sows, and gathers the increase of the land. He has been intimately associated with the interests of the religious society, the church, and the town. He was made an elder during the pastorate of Rev. Loren Thayer. He served as moderator of annual meeting in 1862; treasurer several years; selectman in 1854, '55, '56, '65, '73, '74, '75; representative in 1860, '61. He married Sept. 19, 1844, his third cousin, Lydia Crowell, daughter of **Jesse Crowell** and **Hannah Campbell**, born November 30, 1824. **Hannah Campbell** was the daughter of **Henry Campbell** and **Isabel Gregg. Henry Campbell** was the son of **William Campbell** and **Mary Gregg. William** was the son of the emigrant, **Henry Campbell** and **Martha Black.** Lydia died in Derry on December 24, 1890. Samuel died April 17, 1902 in Derry.

Generation 6: Alphonso F. b. Windham Nov. 30, 1850, died December 24, 1904, resided in Windham; carpenter. Died December 24, Married March 14, 1881 **Eliza Maria Johnson** b. Marlboro, MA. July 28, 1848, died in Windham December 26, 1928.

Generation 7: Willis Cassius, b. Windham, July 14, 1883. d. Windham, December 29, 1973. He married **Elizabeth McCleave**. They were both educators in Yonkers, N.Y. and Willis also at the University of New Hampshire.

Generation 8: Alan McCleave, b. May 28, 1919, d. Windham, 15 May, 1997.

Note: This material has been gathered by Joan Normington and Jean Manthorne from History of Windham in New Hampshire by L.A. Morrison, the research notes of Bessie McCleave Campbell, Rockingham County Deeds and New Hampshire Vital Records.

Receipt for Summer Complaints

one fourth of an ounce of pulverized cloves

" " " " " " " " cinnamon

" " " " " " " " gumguaic, cum

Mixed with one pint of old and pure whiskey to be shaken before taken. Dose for an adult one-half of a wineglass. or a large table spoonful, filled up with water; for a child, proportionably

Hair Dye - 2 oz Hartshorn - 1 drachm nitrate silver add 1 gill of rain water after standing one day

How to Clean Ribbons. In these hard times all economical hints are acceptable. The following recipe has stood the test of experiment: Wet the ribbon in alcohol and fasten one end of it to something firm; hold the other in your hand, keeping the ribbon out straight and smooth; rub it with a piece of Castile soap until it looks decidedly soapy, then rub hard with a sponge, or, if very much soiled, with the back of a knife, keeping the ribbon dripping wet with alcohol. When you have exhausted your patience and think it *must* be clean, rinse thoroughly in alcohol, fold between cloths and iron with a hot iron. Don't wring the ribbon; if you do you will get creases in it that you cannot smooth out.

An English writer has recently asserted that an undue proportion of lime in the system is the cause of premature gray hair, and advises all to avoid hard water, either for drinking pure or when converted into tea, coffee or soup, because hard water is always strongly impregnated with lime. Hard water may be softened by boiling it; let it become cold and then use it as a beverage. It is also stated that a liquid that will color the human hair black and not stain the skin, may be made by taking one part of bay rum, three parts of olive oil, and one part of good brandy by measure. The hair must be washed with this mixture every morning, and in a short time the use of it will make the hair a beautiful black, without injuring it in the least. The article must be of the best quality, mixed in a bottle, and always shaken well before being applied.

Fresh Eggs.—People living in the city often deceived in buying eggs, paying for fresh eggs, and getting stale ones. The following test will determine the length of time an egg has been laid: To determine the precise age of eggs, dissolve four ounces of common salt in a quart of pure water, and then immerse the egg. If it is only one day old, it will descend to the bottom of the vessel; but if three days, it will float in the liquid. If more than five days old, it will come to the surface, and project above it in proportion to its increased age.—*Rural New Yorker.*

To Salt Beef.—The Editor of the New Hampshire *Statesman* gives the following directions for preparing beef for use in winter and spring:

For fifty pounds of beef. Dissolve four ounces of saltpeter in water sufficient to cover the meat. Let the beef remain in this liquid twenty-four hours. Then turn off the water and throw it away. Replace the meat in the vessel, sprinkling two quarts of salt on the layers as they are put in. Let the meat remain thus a few days—three or four—then put in a sufficiency of cold water to cover the meat. Add sugar, or molasses, or both, if you choose.

Beef Brine 100 lbs
" Salt
" Sugar
2 oz Salt peter

Skeleton [illegible]

Cure for Diphtheria.—A correspondent of a Victoria paper writes: Should you or any of your family be attacked with diphtheria do not be alarmed, as it is easily and speedily cured without a doctor. When it was raging in England a few years ago, I accompanied Dr. Field on his rounds, to witness the so-called "wonderful cures" he performed, while the patients of others were dropping on all sides. The remedy, to be so rapid, must be simple. All he took with him was powder of sulphur and a quill, and with these he cured *every* patient without exception. He put a teaspoonful of flour of brimstone into a wine-glass of water, and stirred it with his finger instead of a spoon, as the sulphur does not readily amalgamate with water. When the sulphur was well mixed he gave it as a gargle, and in ten minutes the patient was out of danger. Brimstone kills every species of fungus in man, beast, and plant in a few minutes. Instead of spitting out the gargle, he recommended the swallowing of it. In extreme cases, in which he had been called just in the nick of time, when the fungus was too nearly closing to allow the gargling, he blew the sulphur through a quill into the throat, and after the fungus had shrunk to allow of it, then the gargling. He never lost a patient from diphtheria. If a patient cannot gargle, take a live coal, put it on a shovel, and sprinkle a spoonful or two of flour brimstone at a time upon it, let the sufferer inhale it, holding the head over it, and the fungus will die. If plentifully used, the whole room may be filled almost to suffocation; the patient can walk about in it, inhaling the fumes, with doors and windows shut. The mode of fumigating a room with sulphur has often cured most violent attacks of cold in the head, chest, &c., at any time, and is recommended in cases of consumption and asthma.
