Site walk began at 5:30

The group walked to a previous disturbed stone wall located between the easement land and the Windham Middle School. This breach has been blocked with logs by Jeff Noyles. There have apparently been no further illegal breaches of boundary walls since approximately 2013. The group proceeded to walk "the main trail" to view an area of single track trail which is part of the time trial course. We then viewed an illegal tree stand adjacent to the single track trail. The group then proceeded through the woods heading back to the main trail. No decisions were made at this time. The walk ended at 7:05.
