

**Town of Windham, NH**

**Broadband Availability at  
 Community Anchor  
 Institutions**

This map displays broadband availability based on data submitted to the NH Broadband Mapping & Planning Program as of **March 2014**.

**Broadband Availability by CAI Type**

- |                            |   |
|----------------------------|---|
| <b>K-12 School</b>         | <b>University/College</b>                 |
| Yes                        | Yes                                       |
| No/Unknown                 | No/Unknown                                |
| <b>Library</b>             | <b>Other Community - Governmental</b>     |
| Yes                        | Yes                                       |
| No/Unknown                 | No/Unknown                                |
| <b>Medical/Health Care</b> | <b>Other Community - Non-Governmental</b> |
| Yes                        | Yes                                       |
| No/Unknown                 | No/Unknown                                |
| <b>Public Safety</b>       |   |
| Yes                        |   |
| No/Unknown                 |   |

**Map Notes:**

The federal guidelines for this project define broadband as access that is at least **768 kbps downstream** and **200 kbps upstream**.

Note that satellite internet is excluded from this analysis and display.

The Community Anchor Institution (CAI) inventory includes records for over 4,000 institutions in the state. The inventory was initiated in the spring of 2010 by contacting each institution to establish their baseline broadband availability profile. Mapping was accomplished by the nine regional planning commissions.

The inventory is updated every 6 months using the NHBMP CAI web portal. The GRANIT System at the University of New Hampshire is responsible for the overall management of the inventory, with the nine regional planning commissions providing ongoing technical support.
