

## Town of Windham, NH Level of Service for Broadband Intensive Applications and Uses

This map displays broadband availability based on data submitted to the NH Broadband Mapping & Planning Program as of **September 2014**.

### Broadband Availability at Moderate Transmission Speeds

- Served
- Served With Reported Gaps
- Underserved With Reported Gaps
- Underserved
- Underserved
- Unpopulated Areas

Broadband intensive applications and uses are those that require a minimum of 6 Mbps downstream and 1.5 Mbps upstream to be fully functional. These may include: streaming HD content, connecting 5+ internet devices, video conferencing, etc.

**SERVED:**  
Maximum Advertised Download Speed: 6+ Mbps  
Maximum Advertised Upload Speed: 1.5+ Mbps

**UNDERSERVED:**  
Maximum Advertised Download Speed: 768 kbps - 6 Mbps  
Maximum Advertised Upload Speed: 200 kbps - 1.5+ Mbps

**UNSERVED:**  
Maximum Advertised Download Speed: < 768 kbps  
Maximum Advertised Upload Speed: < 200 kbps

**REPORTED GAPS** are areas where the NHBMP has received user emails or website surveys indicating that no service is available. Additionally, areas where speed tests have been filed that do not meet the minimum speed criteria are flagged as having a gap in service.

**Map Notes:**  
Service providers submitted data to the NH Broadband Mapping & Planning Program (NHBMP) in a range of geographies, including addresses, road segments, census blocks, census tracts, etc. For mapping purposes, all data are aggregated and displayed at the census block level. A census block is mapped as "served" if service is delivered to any part of the block.

Note that satellite and cellular internet are excluded from this analysis and display.  
The GRANIT System at the University of New Hampshire is responsible for the management of the inventory and conducts updates to these data every 6 months.
