Minutes:

The group met in the main area to review a map of the potential overflow parking areas. Not much discussion was had. We then walked to the rear of the building to view two potential areas near the garden. There is an access road from Raulston Rd. which is gated. Ryan said that cars could access both areas from that entrance easily. The gate remains locked.

The group walked back to the school passed a temporary trailer used for office space. Ryan said that would be removed after the new addition was completed.

Ryan gave the group a little tour of the facility, which include a couple of classrooms, the utility room, and a garage area where ATV's are kept.

The site walk ended at 9:15 AM.
