

# Open House and Public Information Session

nationalgrid

## You are invited!

Learn about a proposed transmission system upgrade between Londonderry, New Hampshire, and Tewksbury, Massachusetts. The new overhead line will be approximately 24.5 miles long, and will be constructed by Eversource and National Grid. Approximately 18 miles of it will pass through Londonderry, Hudson, Windham and Pelham in New Hampshire, and 6.5 miles will pass through Dracut, Andover and Tewksbury in Massachusetts.

Keeping the lines of communication open is an important part of our work. We look forward to sharing information with you about the **Merrimack Valley Reliability Project**. There will be an Open House and a Public Information Session in both Rockingham County and Hillsborough County.

## Merrimack Valley Reliability Project

This proposed transmission improvement will strengthen the electric system to better serve residents and businesses in southern New Hampshire and northeastern Massachusetts. As part of the approval process, Eversource and National Grid will file an application for a Certificate of Site and Facility from the New Hampshire Site Evaluation Committee (SEC) in order to construct and operate the proposed transmission line.

Please join us at one of our open house events. Project team members will provide information and answer your questions.
